

FACTSHEET

Prepared to attract **+1000 interactions** on the ground including **+100 Vietnam IT service/solution providers** and hundreds of foreign potential partners from many regions all over the world, over 30 speakers from leading corporations, along with more than 200 business matching sessions during the event and thousands of interactions on the ground, **Vietnam ITO Conference 2019** set goals to be the premium event where industrial leaders around the world come and meet, explore the dynamic innovation and technology landscape of Vietnam, to meet and connect with hundreds of leading Vietnamese IT service providers and gain more innovative ideas for your next digitalization. This year event also showcases technology solutions from “Made in Vietnam” as well as the Vietnam’s innovation capability. This is a leading international technology B2B matching platform, a great opportunity for foreign companies to connect to top tech companies in Vietnam.

Date & Venue

- Date: October 23-24-25, 2019 [Main Conference is on October 24, 2019]
- Venue: Tan Son Nhat Hotel Saigon, 202 Hoang Van Thu, Phu Nhuan District, Ho Chi Minh City, Vietnam

Steering Committee

- Ho Chi Minh City People’s Committee

Organizers

- Investment & Trade Promotion Center of Ho Chi Minh City (ITPC)
- Quang Trung Software City (QTSC)
- VNITO Alliance (VNITO)

Who should join?

This event aims to provide you with in-depth understanding of the dynamic innovation and technology landscape of Vietnam as well as to facilitate your search for the right partners for your next digitalization and post-digitalization strategies. In particular, the participants includes but not limited to:

- Innovation-driven firms seeking IT services/solutions in Vietnam
- Solution providers to introduce innovative products & solutions
- Explorers in quest of case studies on new technologies to enhance competitive advantages
- Entrepreneurs and tech people seeking effective platform for networking/business matching

What In It For You?

- A top tech event with more than 100 IT service/solution providers, in discussion and business matching with a wide range of customers and interested players
- Get involved in discussions on the latest tech trends and innovation ideas
- Establish partnership and meet with like-minded professionals
- Leverage your creativity by learning from experts

Highlights

- Welcome Drink, Networking Session
- Conference & Panel Discussion
- Exhibition, Business Matching, Gala Dinner
- Software Park Tour, Onsite Exploration, Business Opportunities
- VNITO Golf Tournament 2019

PROGRAM

-Tentative-

PRESS RELEASE

VIETNAM ITO CONFERENCE 2019

Main theme: Vietnam – The Emerged Destination for Innovation

Ho Chi Minh City August 27, 2019: Inheriting the success of Vietnam ITO Conferences in [2017](#) and [2015](#), VNITO Alliance, Quang Trung Software City (QTSC), and Investment & Trade Promotion Centre (ITPC) under the direction of the HCM City People's Committee are planning to organize [Vietnam ITO Conference 2019](#) for the 3rd time with the main theme ***“Vietnam – The Emerged Destination for Innovation”*** on October 23-24-25, 2019 (the main conference date on October 24) at Tan Son Nhat Hotel Saigon, 202 Hoang Van Thu, Phu Nhuan District, Ho Chi Minh City, Vietnam. Where the 2015 and 2017 Conferences emphasized Vietnam as a leading Asian destination for software development outsourcing, the 2019 Conference highlights Vietnam's long-term goal of becoming a Southeast Asia's leading innovation center. This year, the Conference will introduce solutions on artificial intelligence (AI/ML), Blockchain, Big Data, IOT, Digital Transformation, and Tech talents, etc. Especially, the Conference has 02 major panels for discussions conducted by top experts from Japan and Korea. The Japanese panel will introduce Japanese partners' success stories when working with Vietnam IT services companies, and how Vietnamese companies can expand their market to Japan. The Korean panel will discuss how Korean tech companies can work with Vietnamese IT companies to get a win-win cooperation.

Vietnam ITO Conference 2019 includes the following activities: International Conference with more than 500 participants, 5 Panel Discussions, a Business Matching Session with more than 30 counters for local and foreign enterprises to meet and explore business opportunities, Technology Exhibitions, Gala Dinner, software park/ IT enterprise tours, and VNITO Golf Tournament 2019. The Conference aims to create an international forum on a large scale, highlight the capacity of Vietnam's IT industry, draw attention and participation of foreign partners, and contribute to promoting the image and potential of Vietnam Information Technology industry as the emerged destination for innovation.

The number of exhibition counters for showcasing impressive products and solutions has significantly increased from 30 counters in VNITO Conference 2017 to 60 exhibition counters in VNITO Conference 2019, of which there are nearly 30 exhibition counters for Korean and Japanese companies, who are in very keen hunger of partnering and cooperating with Vietnamese IT companies. The Organizing Committee expects the business matching session will generate more than 200 networking opportunities at spot.

As of August 26, 2019, the Conference has received registration of more than 300 participants, of which there are more than 100 guests from foreign countries: America, Germany, Australia, Japan, Korea, Singapore, etc. Among them, there are 02 delegations from reputable Korean organizations (Korea IT Cooperation Center and Korea Software Association), and 3 delegations from Okinawa, Tokyo and Fukuoka cities. The number of participants continues to increase as the Conference date approaches. It shows the attraction of the Conference to international community and is the most prestigious conference in Vietnam's IT sector.

According to Mr. Lam Nguyen Hai Long - Honorary Chairman of VNITO Alliance, CEO of QTSC: “Vietnam has been very successful in the software outsourcing field over the past decade. International counterparts have regarded Vietnam as a “Software Development Hub” of Asia for software development outsourcing. Moreover, in recent years, Vietnam has actively implemented many new models and policies such as smart city models, creative cities programs and start-up activities as a meaningful response to The Industrial Revolution 4.0. Vietnam is also a highly open economy with policies of making friends with all countries, thereby helping Vietnam reach larger markets. As a country listed in Top 10 countries that have the most students studying abroad, together with a great number of Vietnamese scientists who are working in developed countries, Vietnam has several favorable conditions to connect and learn the most up-to-date and complicated products and technologies from the world. Those conditions have been offering lots of opportunities and premises for Vietnam to become one of the centers for software development and innovation in Southeast Asia.

Mr. Park Jihwan, CEO of ThinkforBL from Korea, shared: *“We have been consulting over 300 companies in Korea. We always lead their success and never back down until their pain is better. However, Korea's small market and poor software developer resources bother Korean software companies. Our worst solution was trying to solve it by ourselves. Global cooperation is also in global competition. Now, we knew what the real support was for them. For Korean software companies, connecting the best partners for mutual benefit is a real support. We present all the methods we can do without prejudice or blame. We are looking for the global competitiveness of Korean software companies right here in Vietnam.”*

The Organizing Committee would like to invite Vietnam solution providers to participate and introduce innovative products & solutions so that together we drive Vietnam IT industry moving forward. We are also looking forward to welcoming local and international clients who are seeking ITO/BPO solutions in Vietnam; explorers in quest of case studies on new technologies to enhance competitive advantages; and entrepreneurs and tech people who are looking for an effective platform for networking/business matching.
